Art Unit: 1714

Insertion of the data regarding Appn. 60/218,090 in the section [0001] is suggested.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The recited "PAN" in claim 1 is indefinite and a full chemical name (polyacrylonitrile) is needed.

The recited "third filler" in claims 9-11 lacks an antecedent basis in claim 1, and said "third filler" is recited in claim 2 instead. Fillers of spheroid and grain configuration would not meet the aspect ratio of at least 10:1 of claim 1. Also, the recited "second third filler" in claim 9 is confusing.

Claims 1-11 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Itoh et al (US 2002/0022686 A1) teach the instant composition in tables 2 and 3. However, Itoh et al is invalid as a prior art since it was filed on June 13, 2001.

Art Unit: 1714

None of the art of record teach or suggest the process of net-shape molding utilizing the instantly recited composition, and the use of a mixture of PITCH-based carbon material (fiber) and PAN- based carbon material (fiber) having the recited aspect ratio of at least 10:1 with a polymer base resin in net-shape molding would not be obvious to one skilled in the art.
